
PFLDNet 2006 Panel on Transport Protocol Requirements of Future High Bandwidth Applications

Takashi Shimizu (NTT) - 4K Digital Cinema

Masaki Hirabaru (NICT) - e-VLBI

Medy Sanadidi (UCLA) - Mpeg streaming

Jason Leigh (EVL) - Optiputer

-
1. A short introduction of yourself and your institution.
 2. A short description of your application area and the nature of your data flows. E.g. are there multiples? Are they all reliable flows? What transport protocols are you currently using?
 3. An opinion of any special requirements of transport protocols and networking infrastructure, that you believe the research community should focus on, to support your application, especially in the future when it becomes widely deployed. Goal is to help create new research directions.
 4. Open Question/Answer session.
